Professional Profile

Computer Engineer currently specializing through a Master's Degree (**expected completion: July 2026**), with a strong interest in **Artificial Intelligence**. During my academic career, I have deepened my knowledge of **Machine Learning** and **AI** applied primarily to **Computer Vision** and **NLP**. I have developed technical skills in frameworks such as PyTorch and TensorFlow, also through my thesis work (focused on optimizing Vision Transformers via Pruning and NAS techniques) and various academic projects. I am seeking an opportunity to apply these skills, contributing to the development of AI/ML solutions and continuing my professional growth.

Technical Skills

- **Artificial Intelligence:** Computer Vision, Natural Language Processing (NLP), Deep Learning, Machine Learning.
- **AI Frameworks and Libraries:** PyTorch, TensorFlow, Keras, Scikit-learn, Pandas, NumPy.
- **Programming Languages:** Python (Focus on AI & Data Science), Java, C, JavaScript.
- **Databases, Data, and Systems:** Graph Databases (Neo4j), Relational Databases (SQL), JSON, XML, Linux, Windows.
- **Tools and IDEs:** PyCharm, Visual Studio Code, Git.

Relevant Projects

- **ViT Compression Framework** | *PyTorch*
  Design and development of a framework for the compression of Vision Transformer models. Optimization of computational efficiency through Neural Architecture Search (NAS) and pruning techniques.
- **DeepFake Detection with Attention** | *TensorFlow, Keras*
  Development of a system for deepfake image recognition. Initially implemented using classical ML models, then through standard CNN architectures and CNNs equipped with **Attention** mechanisms.
- **SVD CNN Optimization** | *MATLAB*
  Mathematical analysis and implementation of Singular Value Decomposition (SVD) to evaluate the effects of dataset compression on the classification performance of a Convolutional

Neural Network.

- **Face Morphing** | *Python, OpenCV*
  Computer Vision system for the automatic generation of smooth video transitions (morphing) between faces starting from two static input images.

Professional Experience

AI Developer / Intern — **July 2023 – October 2023**
ITALTEL S.p.A. — *Carini (PA)*
Curricular Internship.

- **Main Project:** Design and development of Computer Vision software dedicated to the automatic recognition and counting of labels in photographic inputs.
- **Stack and Skills:** Development and training of Machine Learning models using **TensorFlow** and **Keras** APIs.
- **Architectures:** Design, implementation, and training of **Convolutional Neural Networks (CNN)** for image analysis and classification.

Education and Training

Master's Degree in Computer Engineering (LM-32) — **2024 – Ongoing**
University of Palermo — *Palermo*

- Thesis based on Transformer model compression through pruning and architectural search techniques.

Bachelor's Degree in Computer Engineering (L-8) — **2021 – July 2024**
University of Palermo — *Palermo*

- Final grade: **110/110 cum laude**

High School Diploma (Applied Sciences) — **2016 – 2021**
Michele Cipolla Scientific High School — *Castelvetrano (TP)*

- Final grade: **100/100 cum laude**

Certifications and Languages

- **English:** B2 Level.
- **Italian:** Native Speaker.

I hereby authorize the processing of my personal data in accordance with Legislative Decree June 30, 2003, n. 196 and the GDPR (EU Regulation 2016/679).
